

Glass Reinforced Concrete Components and Boards

REFRAVER range of materials have a track record of superior performance under demanding conditions, meeting the requirements of challenging industries.

REFRAVER is the material trusted by leading rail authorities, being approved to the distinguished SNCF St. 273 cat. 2 level. We are the **Canadian** supplier of high-performance cement boards.

The REFRAVER excels around the world in Railway Switchgear applications due to its unique combination of high strength and superb electrical and thermal insulation properties.

Material Grades

- REFRAVEN R
- REFRAVEN S-silicone treatment for moisture repellence

Applications

- Arc Shields (circuit breakers)
- Electrically Insulating Heat Sinks
- Copper-bottom pan manufacture
- Chimneys for fluorine gasses
- Heat Shields
- Aluminium Smelter Crust Breaker

Key Features

- SNCF St. 273 Cat. 2 approval
- 700 °C intermittent operation
- 500 °C continuous operation
- Unaffected by induction heating field
- Excellent thermal shock resistance
- Rated A1 non-combustible
- Very tough and durable
- Outstanding electrical insulation
